

Use this map to plan and design your map layout. Create a map key to connect coordinate pairs to key locations.

3D Map Addition:

Students have the ability to design their map to have 3D components on their map. Choose at least 1 landmark/feature to design and use with the 3D Pen.

Sketch out your design here with plans for filament color, keeping in mind size restrictions (use measurements or estimates), and realistic expectations for attaching to your map.
