

Teacher Tips for Conservation Bumper Stickers

- Open Google Drive and go to Google Draw
- Use your name as the document title
- Slogan wise, keep it short and simple!
- Use “thicker” fonts like: Permanent Marker, Ultra, Impact, Caveat, etc, make them Bold if needed
- Use shapes or if you are okay with them using pictures they are fine, but must be outline only, like a sketch almost or a simple drawing
- Tell students only to use Black and White and can only add color when they are finished
- If students want to pick the color of their sticker you can show them the vinyl paper and they can pick and label using a post it or just make a list
- All stickers will be about 4x6
